## DETAILED ACTION

### *Election/Restrictions*

1. Applicant's election of the species shown in Fig. 3 in the reply filed on 7 July 2004 is acknowledged. Because applicant did not distinctly and specifically point out the supposed errors in the restriction requirement, the election has been treated as an election without traverse (MPEP § 818.03(a)).
2. Claims 4, 7, 8, 9, and 10 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected species, there being no allowable generic or linking claim. Election was made **without** traverse in the reply filed on 7 July 2004.

### *Claim Rejections - 35 USC § 112*

3. Claims 4, 6-10 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite in that it fails to point out what is included or excluded by the claim language. This claim is an omnibus type claim.

The claims include references to drawing figures, which is improper.

In claim 3 "flywheel" should be --said flywheel--

In claims 3-4 "crankshaft" should be --said crankshaft--.

***Claim Rejections - 35 USC § 102***

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

5. Claims 1-3, and 5-6 (as understood) are rejected under 35 U.S.C. 102(b) as being anticipated by Hirbod.

Hirbod discloses a pushdown piston engine system, comprising: a push step 14 connected to pistons 43 which in turn rotate a crankshaft 32 through connect hands 44; a gear transmission assembly with a flywheel 78, upper and lower stoppers 90,92 mounted in a crankshaft housing 12, wherein said push step can rotate with limited angles on top of the piston, and two wheels 28 attached to a wheel driving gear and bearings 47 (see col. 6 lines 22-26).

***Conclusion***

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The cited prior art discloses vehicles with weight powered drive assemblies.
